

Hovedprosjekt

Marine Recycling Network

Marin gjenvinning bedriftsnettverk

Circular Ocean Conference Ålesund 2018

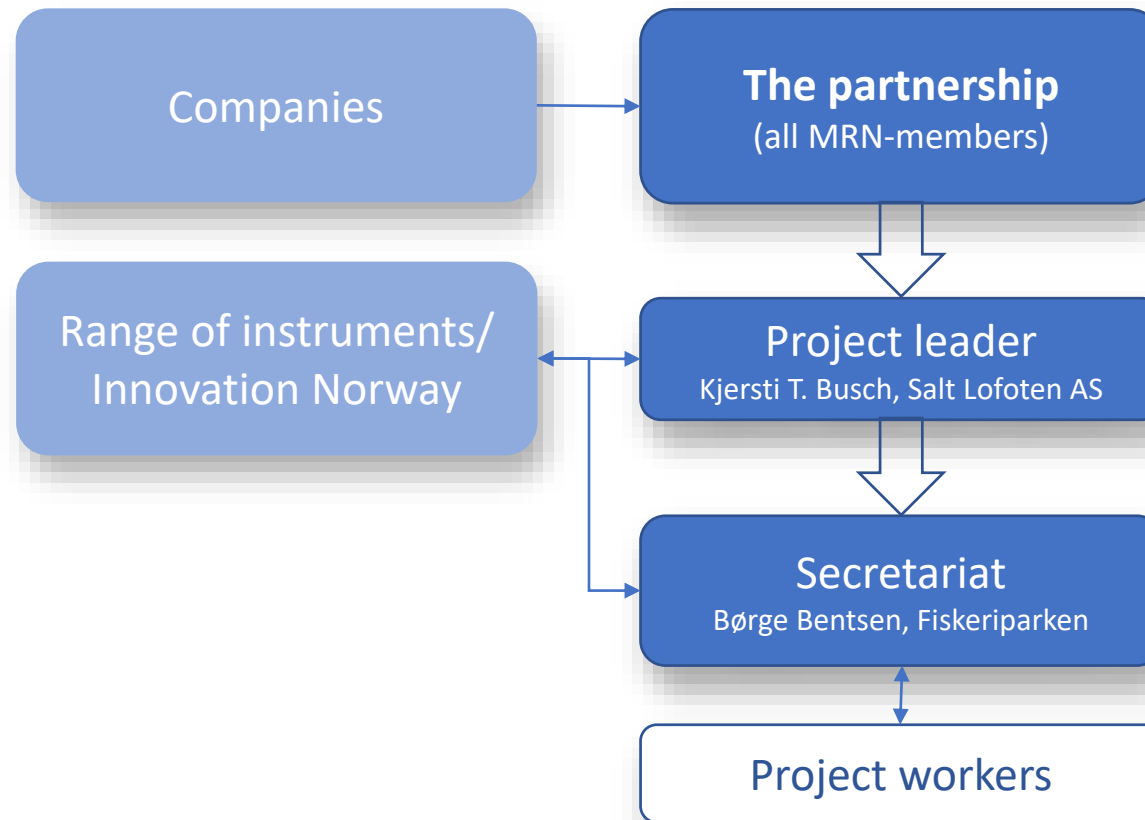

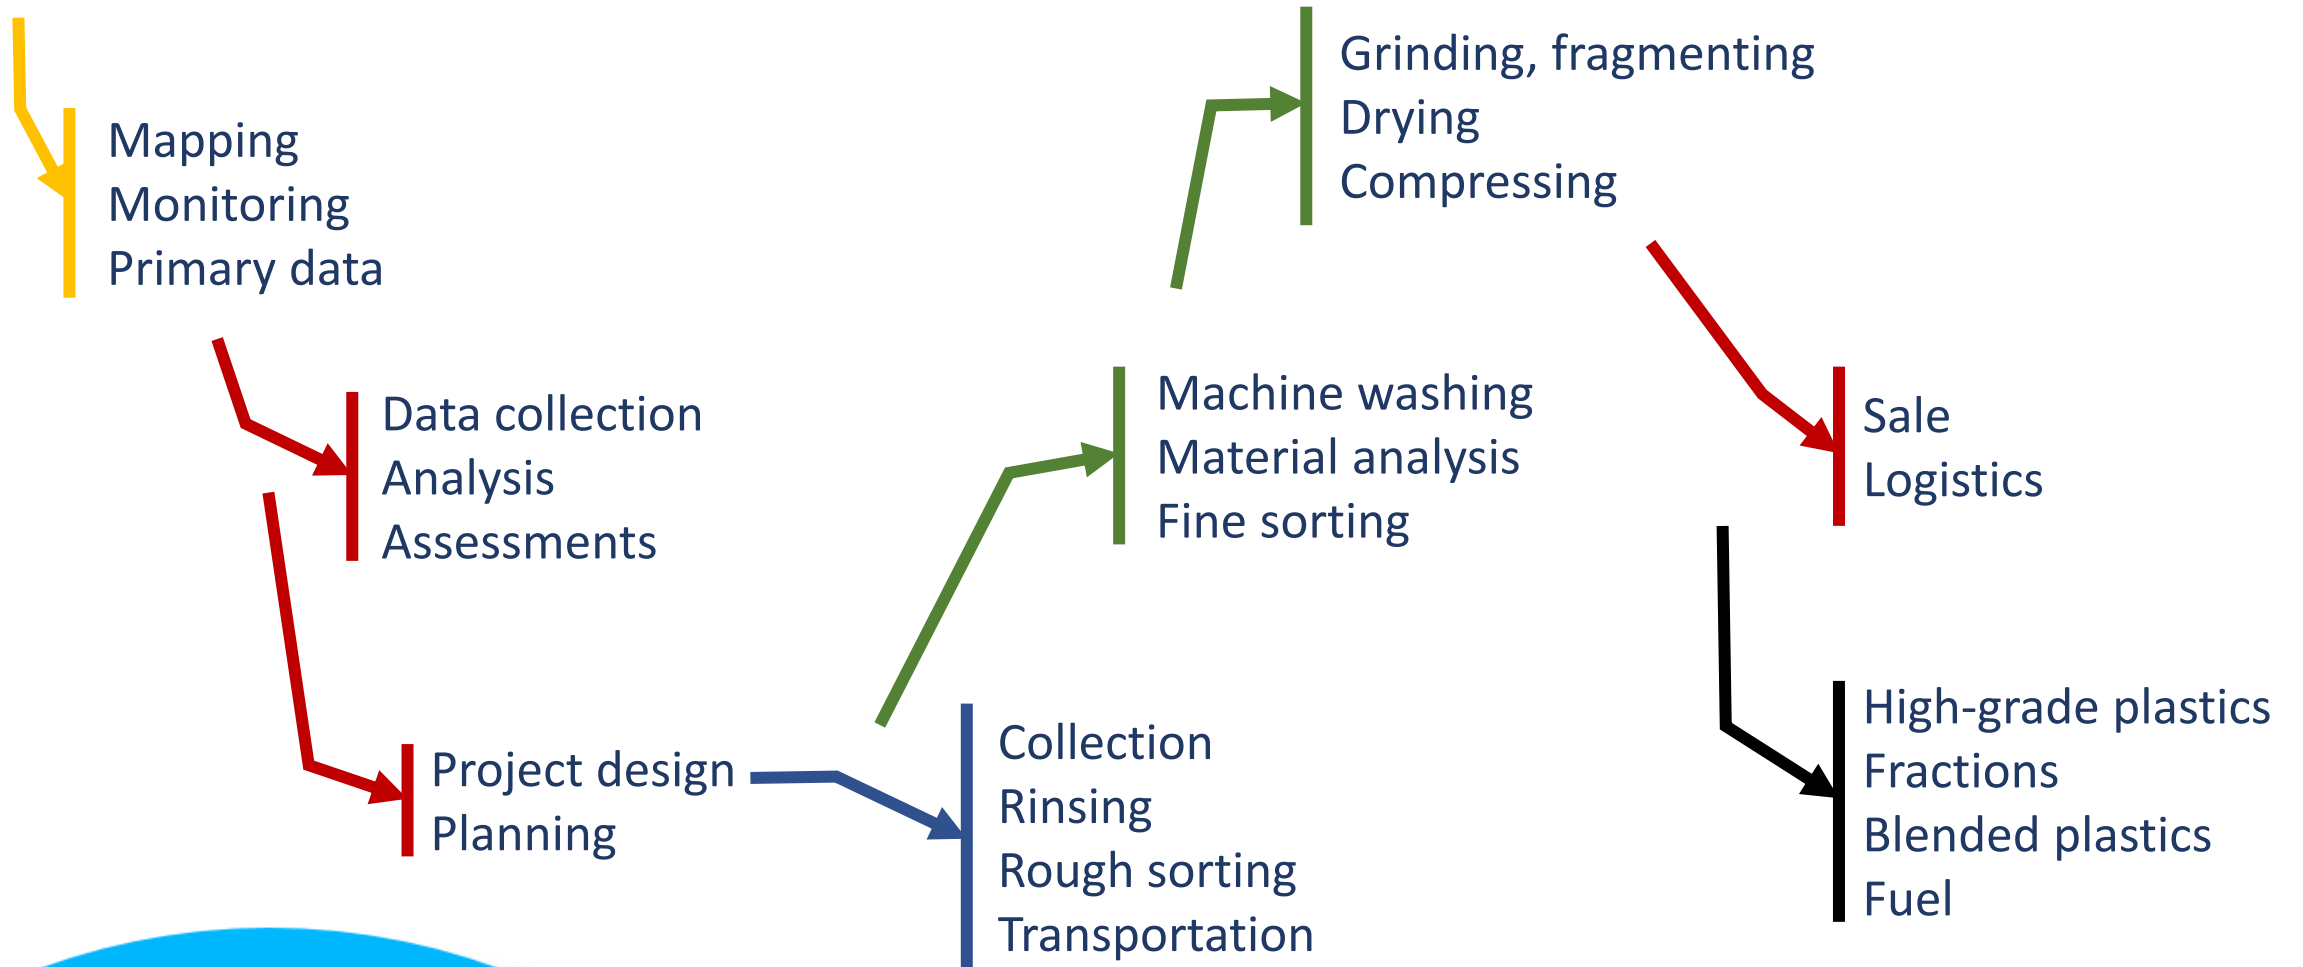

Goals for the main project

- Realize the value chain
- Establish a shared marketing resource
- Develop a business plan for the MRN value chain
- Plan competence measures
- Prepare the end-of-life reception and processing of small recreational vessels

Organisation of MRN

The value chain

Activities within the network

- Describe each company's delivery in the value chain
- Describe R & D needs
- Write applications for funding of R & D projects
- Map the necessary market data
- Develop business plan proposals
- Develop and establish a joint marketing resource
- Identify competence needs
- Make plans for an international supplier fair

The way forward for MRN

- Still in an early phase
- The first part of the initiative has focused on companies in the area Lofoten-Vesterålen
- But there are no limitations on geographical area
- Not necessary to have worked with marine litter before, but need to have ambitions and ideas around this for the future

Admission of new members

Criteria for admission

- Accept and adopt the aim of MRN
- A commercial focus
- Fit in the MRN value chain
- Complementary technology and expertise
- No fundamental conflicts of interest

Member companies

- **NorLense AS:** Oil booms and trawl that can be used for catching marine litter in the water column.
- **NorLense Beredskap AS:** Expertise in oil spill operations and beach cleaning.
- **SMV Hydraulic AS:** Hydraulic equipment and winches. Cooperates with NorLense.
- **Grovfjord båtbyggeri AS:** Shipyard specialising in service boats.
- **Reno-Vest Bedrift AS:** Handling of solid waste.
- **Lofoten Avfallsselskap IKS:** Handling of solid waste.
- **Norsk Gjenvinning AS:** Handling of solid waste, also hazardous waste.

Member companies

- **Melbu Systems AS:** Oil recovery equipment ++.
- **Heli-team AS:** Helicopter services, removing of litter in inaccessible terrain.
- **Momek PTN AS:** Industrial pump solutions.
- **Andøya Space Center AS:** Visual mapping with drone-technology.
- **SALT Lofoten AS:** deliver services within research, consultancy and outreach related to the coast and sea.
- **Fiskeriparken AS:** Project-facilitator with special competence within fisheries and coastal industries.
- **Quantafuel AS:** Production of synthetic diesel fuel, based on plastic waste.
- **Velomar AS:** Development and production of equipment, carrying out clean up campaigns, education.

Bedriftsmarkedet

Veiløst eller ikke, landet må bygges! Ved behov for materiell- og personelltransport, er helikopteret ofte den beste løsningen med hensyn til miljø, effektivitet og kostnad. Vi er behjelpelig med å komme med råd for å dekke dine behov.

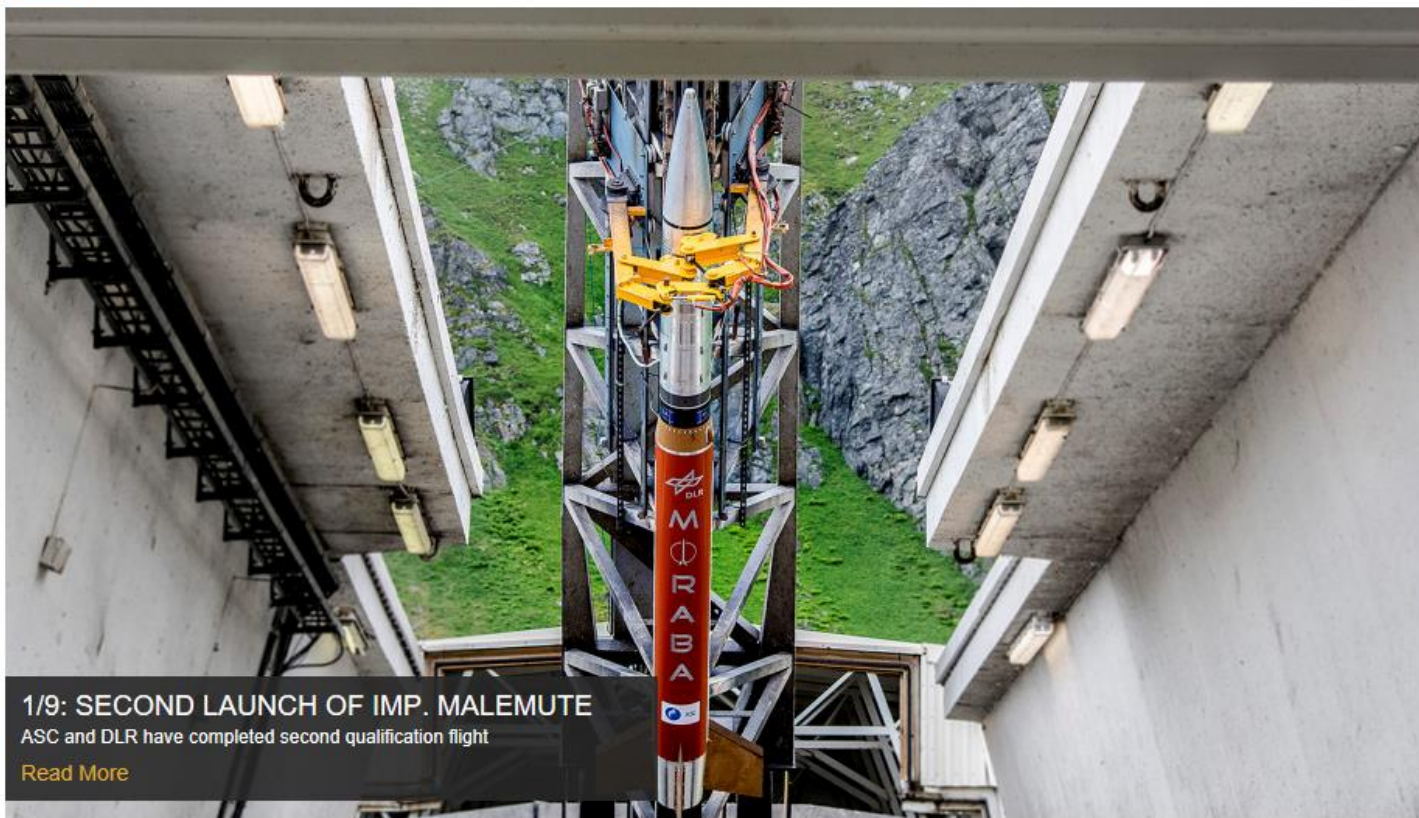

Privatmarkedet

Heli-Team har lang erfaring fra at også privatpersoner i stor utstrekning har behov for våre tjenester. Herunder lag/foreninger, privatpersoner, små og store arrangementer. Helikopter og helikoptertjenester gir mange muligheter!

Heli-Team AS

Heli-Team er det ledende helikopterselskapet i det nordnorske innlandsmarkedet. Selskapet ble etablert i 1988, har hovedbase i Harstad og er til enhver tid representert i hele landsdelen. Les mer om selskapets historie.

QUANTAFUEL TURNS WASTE INTO HIGH-QUALITY FUEL

CLEANER ENVIRONMENT

Quantafuel's technology has several environmental advantages. It reduces plastic waste, local pollution and emission of greenhouse gases. A third-party, independent research firm has compared the environmental impact of Quantafuel's process to that of producing conventional diesel, concluding that our process reduces emission of greenhouse gases by more than 80 percent. The results from our first-generation plant in Mexico already show a total reduction of carbon emissions of 66 percent compared to conventional diesel.

COMPACT AND INEXPENSIVE

PATENTED TECHNOLOGY

QUANTAFUEL

TRANSFORMS WASTE RESOURCES INTO ENVIRONMENTALLY
FRIENDLY, SYNTHETIC DIESEL
